

## Experiment -2.1

**Student Name:** Vinay

**Branch:** AIT-CSE(DevOps)

**Semester:** 4th

**Subject Name:** Git and Hub

**UID:** 22BDO10040

**Section/Group:** 22BCD-1/A

**Date of Performance:** 07/01/2024

**Subject Code:** 22CSH-293

1. **Aim/Overview of the practical:** Editing a file and committing changes on GitHub.

2. **Software Used:** Git Bash, GitHub.

3. **Steps for experiment/practical:**

1. Create or clone a repository on your local machine and open GIT BASH.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/OneDrive/Desktop/git (master)
$ git clone https://github.com/Vinay000001/first.git
Cloning into 'first'...
remote: Enumerating objects: 28, done.
remote: Counting objects: 100% (28/28), done.
remote: Compressing objects: 100% (25/25), done.
remote: Total 28 (delta 9), reused 0 (delta 0), pack-reused 0
Receiving objects: 100% (28/28), 10.86 KiB | 2.17 MiB/s, done.
Resolving deltas: 100% (9/9), done.
```

2. Create or open a file in the master or main branch , eg , **file.c**
3. Add the file to the staging area using **git add** and then commit the changes using the **git commit** command.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ cat file.c
exp4

thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ git add file.c

thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ git commit -m "added"
[main 4334872] added
1 file changed, 1 insertion(+)
create mode 100644 file.c
```

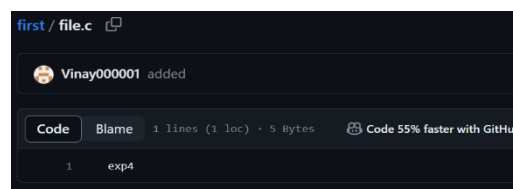

4. Pull the changes to the remote repo using the command **git push <remote\_name> <branch\_name>**.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ git push origin main
Enumerating objects: 4, done.
Counting objects: 100% (4/4), done.
Delta compression using up to 12 threads
Compressing objects: 100% (2/2), done.
Writing objects: 100% (3/3), 267 bytes | 267.00 KiB/s, done.
Total 3 (delta 1), reused 0 (delta 0), pack-reused 0
remote: Resolving deltas: 100% (1/1), completed with 1 local object.
To https://github.com/vinay000001/first.git
88f0090..4334872 main -> main
```

5. You will be able to see the changes in the remote repository.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ cat file.c
exp4
```

( local )

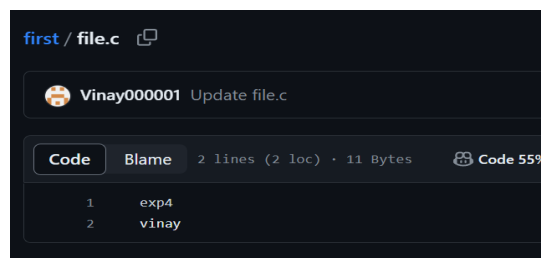

( remote )

6. Now, make some changes in the file in the remote repository and pull those changes in the local repository.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ git pull origin main
remote: Enumerating objects: 5, done.
remote: Counting objects: 100% (5/5), done.
remote: Compressing objects: 100% (2/2), done.
remote: Total 3 (delta 1), reused 0 (delta 0), pack-reused 0
Unpacking objects: 100% (3/3), 918 bytes | 91.00 KiB/s, done.
From https://github.com/vinay000001/first
* branch          main      -> FETCH_HEAD
  4334872..6431889  main      -> origin/main
Updating 4334872..6431889
Fast-forward
 file.c | 1 +
 1 file changed, 1 insertion(+)
```

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ cat file.c
exp4
vinay
```

( remote )

( local )

7. Create a new branch and checkout to it using the **git checkout -b** command , eg , **test**.
8. Open the **file.c** on the **vi** editor and make some changes in it.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ git checkout -b test
fatal: a branch named 'test' already exists

thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ git checkout test
Switched to branch 'test'

thaku@LAPTOP-D9AREPUF MINGW64 ~/first (test)
$ vi file.c

thaku@LAPTOP-D9AREPUF MINGW64 ~/first (test)
$ git add file.c

thaku@LAPTOP-D9AREPUF MINGW64 ~/first (test)
$ git commit -m "changed"
[test ec58ff4] changed
 1 file changed, 3 insertions(+)
 create mode 100644 file.c
```

9. Merge the changes made in the **test** branch with the **master** branch and resolve the conflicts manually if necessary.
10. Push the **master** and **test** branch onto the remote repository.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/OneDrive/Desktop/git/first (main)
$ git push origin main
info: please complete authentication in your browser...
Enumerating objects: 7, done.
Counting objects: 100% (7/7), done.
Delta compression using up to 12 threads
Compressing objects: 100% (6/6), done.
Writing objects: 100% (6/6), 622 bytes | 311.00 KiB/s, done.
Total 6 (delta 3), reused 0 (delta 0), pack-reused 0
remote: Resolving deltas: 100% (3/3), completed with 1 local object.
To https://github.com/Vinay000001/first.git
bf66104..4ff5981 main -> main

thaku@LAPTOP-D9AREPUF MINGW64 ~/OneDrive/Desktop/git/first (main)
$ git checkout test
Switched to branch 'test'

thaku@LAPTOP-D9AREPUF MINGW64 ~/OneDrive/Desktop/git/first (test)
$ git push origin test
Total 0 (delta 0), reused 0 (delta 0), pack-reused 0
remote:
remote: Create a pull request for 'test' on GitHub by visiting:
remote:   https://github.com/vinay000001/first/pull/new/test
remote:
To https://github.com/vinay000001/first.git
* [new branch] test -> test
```

11. You will be able to see the new changes in the remote repository.

MINGW64:/c/Users/thaku/first

```
exp4
vinay
22bdo10040
```

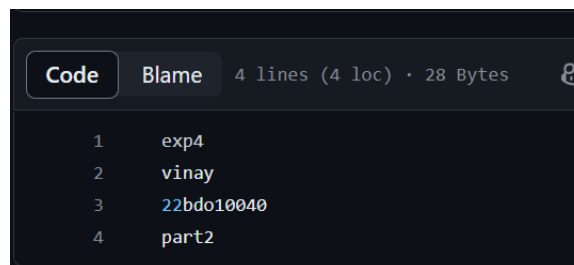

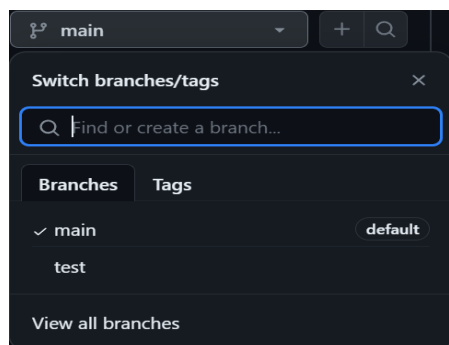

**Code**   **Blame**   3 lines (3 loc) · 22 Bytes

1	exp4
2	vinay
3	22bdo10040

( local )

( remote )

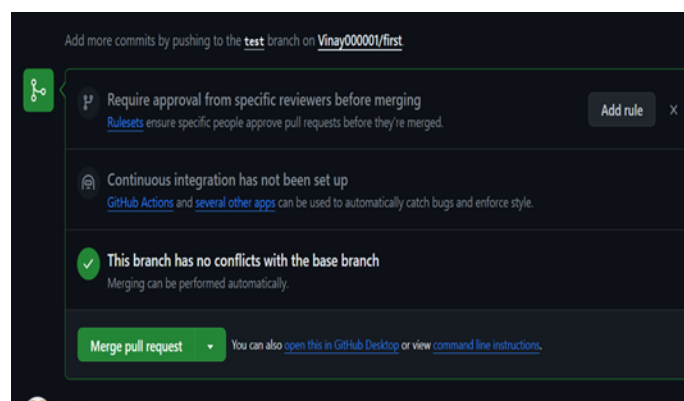

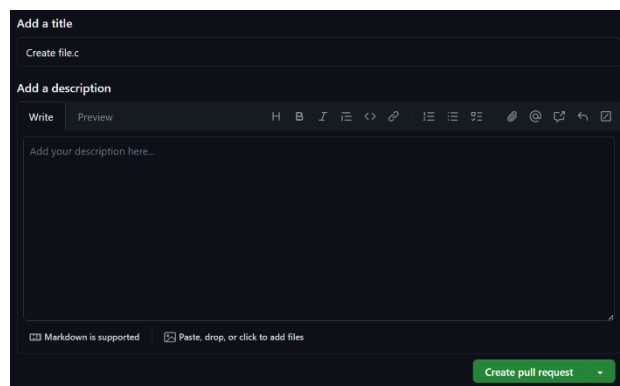

12. Now, Go to github, open the repository and move to the **test** branch and make some changes in a file.

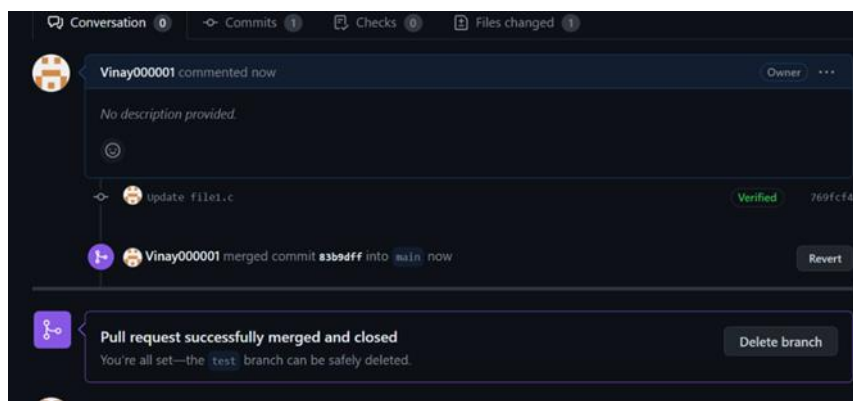

13. Commit the changes and move to the **master** branch. Click on the **Compare & Pullrequest**.

14. Create the pull request, resolve the merge conflicts (if any) and then **merge pullrequest**.

15. After the merging, you may choose to delete your branch, i.e., **test**

16. Now, pull the changes to the local repository using **git pull**.

```
thaku@LAPTOP-D9AREPUF MINGW64 ~/first (main)
$ git pull origin main
remote: Enumerating objects: 5, done.
remote: Counting objects: 100% (5/5), done.
remote: Compressing objects: 100% (2/2), done.
remote: Total 3 (delta 1), reused 0 (delta 0), pack-reused 0
Unpacking objects: 100% (3/3), 918 bytes | 91.00 KiB/s, done.
From https://github.com/Vinay000001/first

Updating 4334872..6431889
Fast-forward
 file.c | 1 +
1 file changed, 1 insertion(+)
```

17. You will be able to see the changes in your local repository.

( remote )

( local )

## 4. Result/Output/Writing Summary:

In this experiment, we have edited a file in the local repository and shown the changes on the remote repository and vice versa. For this purpose, we have made use of both Git and GitHub.

**Learning outcomes (What I have learnt):**

1. Learnt how to create a branch.
2. Learnt how to push the changes to the remote repository.
3. Learnt how to pull the changes from the remote repository.
4. Learnt to merge two branches.
5. Learnt how to resolve merge conflicts.

**Evaluation Grid (To be created as per the SOP and Assessment guidelines by the faculty):**

Sr. No.	Parameters	Marks Obtained	Maximum Marks
1.			
2.			
3.
